SATURDAY, JOHE S- 6 P. M. The feature of the stock market to-day was an advance along the line, especially in the securi ties that have been and are the most speculative There is no more reason for this change, however, than for one that might occur in the opposite direction, and, according to the information which is obtainable, it is rather the result of a fright on the part of a large and somewhat reckless short interest than of any real or substantial evidence that it is time for the bears to change base and adapt their future operations to a permanently higher market. The "point" has been industriously circulated that at a meet-ing of the presidents of some of the leading railroads, among which are mentioned Eric, New York Central and Pennsylvania, propositions would be considered looking to a settlement of many vexed questions that have occasioned the pending railway war in which Mr. Garrett, the Prosident of Baltimore and Obio, has been chief and leader; but it is given out by those who are supposed to know of the inside history, that it is equally probable tout, instead of yielding one tota to the demands of the Baltimerean Colonel, fom Scott and his powerful coadjutors, will make the contest even warmer, and by putting down still further the rates on freight and passengers augment the difficulties with which their competitor is obliged to contend. These possibilities, being generally misinterpreted by the street, may explain the peculiar strength of the market, that an opportunity has been used to advance prices in order that a more profitable sale may be made aext week. Manipulation may easily advance the market value of securities, but it seems to be the experience of the past sixty days that natgrai causes quickly knock them down again. A RESIDW OF PRICES
